

# PIR movement and presence detectors 10 A

Hotel room energy-enabling units

Lighting control in corridors (for hotels, offices and hospitals)

Offices, swimming baths and schools

Staircase light control

**18**  
SERIES

FINDER reserves the right to alter characteristics at any time without notice. FINDER assumes no liability for damage to persons or property, caused as a result of the incorrect use or application of its products.

### PIR movement detectors for internal or external installations - wall mounting

#### Type 18.01

- Internal installation
- Surface mounting

#### Type 18.11

- External installation (IP54)
- Surface mounting

#### Type 18.A1

- External mounting (IP55)
- Terminal for PE connection
- Push-in terminals

- Output contact connected to supply live
- Small size
- Adjustable ambient light intervention threshold
- Adjustable Light ON Time
- Universal mounting position - permits the selection of any area for survey
- Wide angle of survey

18.01/18.11  
Screw terminal

18.A1  
Push-in terminal

NOTE: with 110...125 V AC supply, the Ratings (AC1, AC15 and lamp loads) must be reduced by 50 % (e.g. 500 W instead of 1000 W)

For outline drawings see page 17

#### Contact specification

	18.01	18.11	18.A1
Number of contacts	1 NO (SPST-NO)	1 NO (SPST-NO)	1 NO (SPST-NO)
Rated current/Maximum peak current	10/20 (100 A - 5 ms)	10/20 (100 A - 5 ms)	10/20 (100 A - 5 ms)
Rated voltage/Maximum switching voltage	230/230	230/230	230/230
Rated load AC1	2300	2300	2300
Rated load AC15 (230 V)	450	450	450
Nominal lamp rating 230 V:			
incandescent/halogen W	1000	1000	1000
fluorescent lamp with electronic ballast W	500	500	500
fluorescent lamp with electromechanical ballast W	350	350	350
CFL W	300	300	300
LED 230 V W	300	300	300
halogen or LV LED with electronic ballast W	300	300	300
halogen or LV LED with electromechanical ballast W	500	500	500
Standard contact material	AgSnO <sub>2</sub>	AgSnO <sub>2</sub>	AgSnO <sub>2</sub>

#### Supply specification

- Sensing area 360°

**Movement and presence detectors with Push-in terminals. For internal installation.**

**Type 18.5D with DALI interface**

Three selectable functions:

- Daylight-linked constant light level control
- ON/OFF control with early warning
- ON/OFF control with early warning + courtesy light level

**Type 18.5K with KNX interface**

- 2 outputs (data telegrams) for load control (Lighting, HVAC etc.)
- 1 output (data telegram) – movement/ presence detected
- Adjustment of ambient light threshold, and PIR sensitivity
- Master/Slave mode for increased sensing area
- Selectable function to inhibit ambient light threshold control
- Reporting of light level and movement status (for security purposes, etc.)

		mm <sup>2</sup>	1 x 6 / 2 x 4	1 x 4 / 2 x 2.5	2.5	2.5
		AWG	1 x 10 / 2 x 12	1 x 12 / 2 x 14	14	14
Wire strip length		mm	9	9	8	8
Other data						
Power lost to the environment		without output current	W	0.3		
		with rated output current	W	1.4		

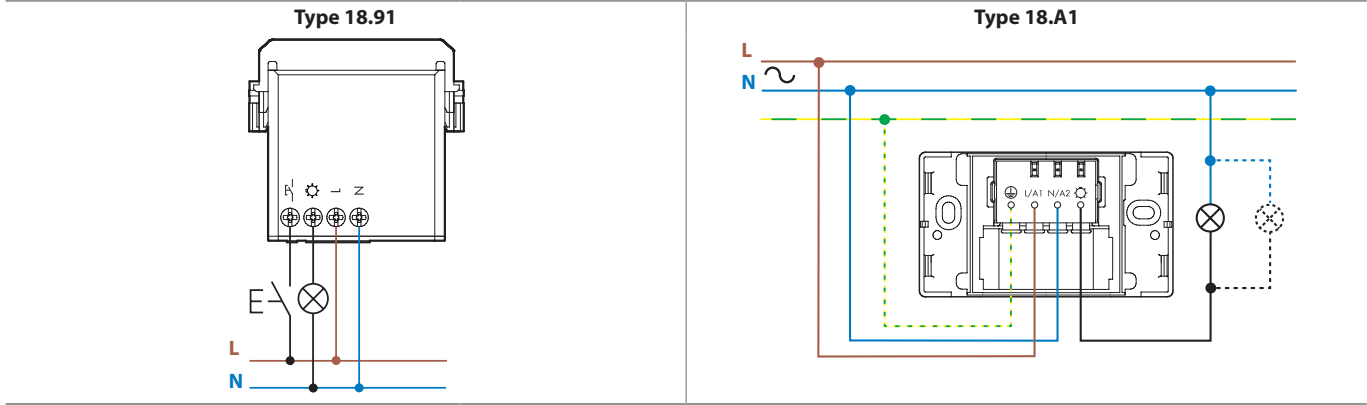

- Following the initial power-on, and power-on following a power interruption, the detector makes a hardware-software initialisation for approximately 30 seconds. However, the behavior of the output during this 30 seconds will depend on certain circumstances:
  - If the detector was in the On state before the power interruption, and if the lighting level is (currently) below the pre-set threshold, then the output contact will immediately close when the power is re-applied, for the time delay set by the potentiometer (irrespective of whether movement is being detected).
  - If the detector was in the Off state before the power interruption, or if the ambient light is currently over the pre-set threshold, then the detector will not switch-on until the end of the initialisation phase (assuming movement is then detected).

Wiring diagram

The nominal lamp rating as stated in the contact specification applies when wiring is realized in accordance with the diagrams above. If the load is powered from a phase different to that powering the Movement detector, then a 50% reduction in the lamp rating must be considered.

### Wiring diagram

Note: Observe the polarity indicated for Phase and Neutral

### Type 18.51-B300 - Bluetooth

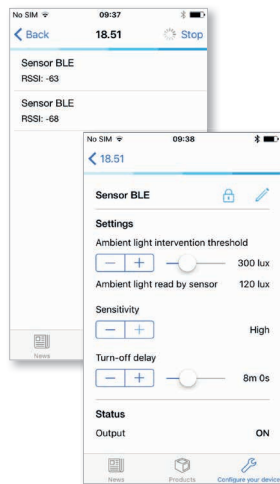

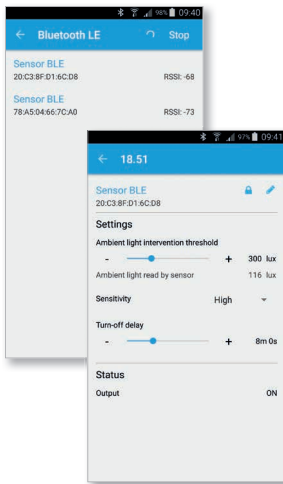

Through the use of Bluetooth LE (Low Energy) technology programming the detector's operating characteristics can be easily and conveniently done using an Android or iOS smartphone.

After installing the 18.51, simply download the Free **App Finder Toolbox** from Google and Apple's official stores and set all the required parameters.

Finder Toolbox

Android, Google Play and the Google Play logo are trademarks of Google Inc.  
Apple is a trademark of Apple Inc. App Store is a service mark of Apple Inc.

Detectors can be named and uniquely identified within a building. The ambient light level threshold can be adjusted between 4 lux and 1000 lux, the Light On delay time can be set from 12 seconds to 25 minutes, and the movement detector set to one of three sensitivity levels. When Bluetooth connection is made to a detector a red LED signals the correct pairing and that all the set parameters have been transferred. The detector then responds with two feedback values - brightness as read by the light sensor in the detector and the contact status, if closed (On) or open (Off). For security, the detectors can be locked by a selector switch and a 4-digit PIN - preventing parameter changes by unauthorized persons.

Functions

Type Functions

18.51...0040

**Push-button function**

A control pulse on the push-button inverts the status of the output relay, until the timing after the last movement detected is elapsed.

**Dynamic Light Compensation**

By incorporating Finder's Patented "light feedback compensation" principle, the 18.51...0040 is able to calculate the artificial light contributed by the lamps controlled by the output relay. In effect, this means the 18.51...0040 is able to continuously monitor the natural ambient light level, even when the output is On. As a consequence, whenever the natural light level exceeds the threshold setting the output is forced Off. This can significantly minimise the time the lighting is On, particularly where there is a high level of traffic - and cost savings can be considerable. This is an advance over other types of movement detectors, which are unable to identify the natural ambient light level when the output is On and so can only turn Off after the time delay that follows the last detected movement. In busy areas this may mean that the movement detector is being continuously re-triggered and maintained in the On state, even though the natural light level has long risen above the threshold.

18.5D

**Comfort - Daylight-linked constant light level control**

Adjusts to maintain a constant brightness level considering the detection of movement and the level of daylight - increasing or decreasing the power of the artificial light as appropriate. Suitable for small offices, classrooms or workplaces. This allows considerable energy saving while maintaining a comfortable level of illumination.

**Simplicity - ON/OFF control with early warning**

Works as a simple movement detector, activating the lamps at 100% power. But provides an early warning of the next shutdown with a power reduction to 50% for 20 seconds. Avoids a sudden total shutdown of lighting.

**Courtesy - ON/OFF control with early warning + courtesy light level**

If the brightness level is lower than the set value, artificial light is maintained at 10% power, guaranteeing a minimum level of illumination at all times. When movement is detected, the power of the lamps is raised to 100%. There is an early warning of any reduction from the 100% power level by a reduction to 50% for 20 seconds. Suitable for common areas, lobbies, corridors, elevator zones.

18.91

**Detection of movement**

Detected movement closes, or keeps closed, the output contact. Operating the push-button closes, or keeps closed, the output contact - for the set time T.

**Sensing area**

**18.01, 18.11, 18.A1 - Wall mounting**

**18.01, 18.11 - Ceiling mounting**

**18.21, 18.31 - Ceiling mounting**

**18.31...0031 - Internal ceiling installation, surface mounting**

**18.31...0031 - High ceilings installations**

**18.41**

**18.51/18.51...B300/18.5K**

**18.61**

**18.91**

**Accessories**

Example: 18.21/18.31 with Beam limiter

**Beam limiter (supplied with the types 18.21/31/41/51)**

At an installation height of 2.8 meters the area of survey will reduce at:  
 18.21/18.31: diameter 2 meters  
 18.41: 2.5 x 6 meters  
 18.51: 2 x 2 meters

### Push-in terminals for 18.41, 18.51, 18.5D, 18.61 and 18.A1

The push-in terminals permit the quick connection of solid wires or ferrules by their simple insertion into the terminal (A). It is possible to open the terminal to extract the wire by first pushing down on the push-button using a screwdriver or fingers (C). For stranded cable it is necessary first to open the terminal using the push button, both for the extraction (C) and insertion (B).

Double terminals for the easy "looping" between multiple 18 Series. The Max. wire size for each terminal is 2.5 mm<sup>2</sup>.

The terminals are equipped with a test hole to take a test probe.
